This course will explore the relationship of medicine and literature. We will read a variety of texts, including fiction, medical writing, critical and historical work. Key questions will be: how does the advent of modern medicine shape literature? How has the role of both clinician and patient changed over time? What are some key themes in the literature? How does the emerging conversation about “narrative medicine” and “medical humanities” relate to the history and literature of health and disease? Etc. We will approach our material thematically. However, the material in each category might easily overlap into others.

This course provides upper-division honors credit in the major, and will be taught with that in mind; however, interdisciplinary work is encouraged, and there is room to tailor your final paper to individual interests. There is a considerable amount of reading. Carefully consider your reading speed and the expectations of the other courses you are taking before committing to this course.

Requirements include a long paper (turned in over two dates), a project-presentation, and reading quizzes— as well as lots of reading and discussion.

Attendance and Participation:
The most important “materials” in any class are the insights and knowledge that the class members bring to the information being discussed. In a sense, if a class member does not participate in discussion and related activities, that person is depriving the rest of the members of the class of one of the most important components of their education. Your participation is very important to everyone here.

If you must miss class, be sure to arrange to get the notes from a classmate. Poor participation or attendance will affect your grade; given that every absence is a week missed, more than one absence or two latenesses will lower your grade.

**Grading:**

Grading will reflect University standards, and will be based largely on the papers and the quizzes, as well as timely completion of non-graded activities.

- Long Paper (in two stages) 50%
- Quizzes 30%
- Project 20%

**Paper:**

The paper will be 16-18 pages. We will have two deadlines; one for one part of the paper and the second for the full length paper that will include the earlier one as part of it. You are expected to do reading/research beyond the assigned reading for this paper, which should demonstrate an original and critical engagement with a research topic. Essays will be double-spaced, with one inch margins in a normal typing font (e.g. Times New Roman), with a point size of 12.

The end of term paper will include the following: an Introduction of no more than 1.5 pages, 7-8 pages research synthesis on a topic related to an issue you choose related to the class (a disease, medical ethics, a topic in treatment—you have a lot of freedom here, but you will run it past me early for approval), 7-8 pages of analysis of a literary text (poetry, drama, novel, film, or nonfiction approached as literature) related to the material in your research synthesis, including one or two appropriate critical sources related to the text, and approximately .5 page conclusion. You will choose your literary text and two sources first, and your close reading of that will be the first paper. The second paper will fold the first into the full paper, which will also include an analysis of research on your topic. The first paper will receive a grade; in the second, you will have a chance to revise it as well as adding the new material, and if the second grade is better than the first, then that will be the grade that stands for both papers. If not, then each of the two will be worth 25 percent (to total 50% of the course grade).

**Quizzes:**

These are reading quizzes. If you do the reading, you should be able to answer most of the questions. I will drop the three lowest scores, including zeroes if you miss them, but they cannot be made up.

**Project:**

You will work individually or in pairs to complete a project that approaches the course material in a creative, innovative way. We will talk more about options for this, and I’ll give you detailed information.
about expectations and possibilities. You will present your work to the class (5-7 minutes each.) Your project may be related to your paper, though it should not duplicate it.

Discussion:

Because of the nature of the class and its upper division status, this class will be based on discussion and in-class activities. Each student is expected to participate – to speak in class, to answer and ask questions and to come prepared each day. I may call on students as a normal part of the class process. It is acceptable to make mistakes or not to know the answer to questions; it is not acceptable to give up or refuse to try.

Please do not underestimate the value of class participation. I don’t grade separately for discussion because it is a basic requirement of the course, like coming regularly or turning in papers on time. However, as with those other basic requirements, your responsible completion of them can push a “split grade” higher, whereas failing to take those responsibilities seriously will result in a substantially lowered grade, regardless of your performance on graded exercises.

Statement of student disability services.

The Disability Resource Center in the Dean of Students Office provides information and support regarding accommodations for students with disabilities. For more information, see: http://www.dso.ufl.edu/drc/ (Links to an external site.)

Statement on harassment.

UF provides an educational and working environment that is free from sex discrimination and sexual harassment for its students, staff, and faculty. For more about UF policies regarding harassment, see: http://www.dso.ufl.edu/sccr/sexual/ (Links to an external site.)

Statement on academic honesty.

All students must abide by the Student Honor Code. For more information about academic honesty, including definitions of plagiarism and unauthorized collaboration, see: http://www.dso.ufl.edu/sccr/honorcodes/honorcode.php (Links to an external site.)

Statement on electronics in class:

I allow you to use electronic versions of most of the texts, so you may have your devices on. However, the classroom is a workspace for this course, and I expect you to honor that. That means that during the class, you are not texting, watching videos, using social media, or doing online work for other classes—or anything else I haven’t mentioned here that doesn’t directly relate to your work for this course. Violation of this standard can cause you to be marked absent.
Course evaluations:

Students are expected to provide feedback on the quality of instruction in this course based on 10 criteria. These evaluations are conducted online at https://evaluations.ufl.edu. Evaluations are typically open during the last two or three weeks of the semester, but students will be given specific times when they are open. Summary results of these assessments are available to students at https://evaluations.ufl.edu/results (Links to an external site.)
